Morning Hannah – the open well & pipe doesn't sound like 1113/1114 but there is definitely 2 beside each other so must be the ones near Old Renwick Road as no other irrigation pairs

Pete

Greetings Peter you are right with your assumptions the first well was an open well to 12 feet and a pipe from there. The second well is approximately 6 to 10 ft west of the first. Trust this helps
Regards Hugh

Subject: Marlborough District Council historic well question for Hugh Bay relating to Omaka Orchard Old Renwick Road

Hi Hugh,

Its Peter Davidson here – groundwater hydrologist at Marlborough District Council in Blenheim. MDC are checking the location of the several thousand water wells in its database are correct. We were wondering if you could help us with 2 wells drilled on the Omaka Orchard property on Old Renwick Road in the 1970s. Both were drilled by Waimea Drilling for orchard irrigation - the first in 1971 and the second in 1978. I've attached the drillers logs. The question we had for you was whether both wells were drilled near to each other near Old Renwick Road where the Alan Scott pump shed is now located? We are sure the 1978 well (P28w/1114) was the main irrigation well near Old Renwick Road for the apples - but we aren't sure where well P28w/1113 was drilled but probably near to well P28w/1114? This doesn't affect consents Hugh its just to make sure the information we show to the public of water well location on our website is accurate. Any help you could give us would be great !

Regards
Peter
